

```
1 C:\Users\Shibli\AppData\Local\Microsoft\WindowsApps\
python3.10.exe "E:\Data Science\Django web
Development for AI\cl-01-basic-python\assignment-01.
py"
2 write your name Shibli Nomani
3 My name is Shibli Nomani
4 input your batch number Batch-01
5 My batch number is Batch-01
6 variable name is _power 2
7 variable name is power 3
8 variable name is power01 4
9 variable name is lists 5
10 variable name with Snake Case format is power_number
6
11 variable name with Pascal Case format is PowerNumber
10
12 value of x, y, z are respectively 10 10 10
13 Memory Allocation of x is 2353249911312
14 Memory Allocation of y is 2353249911312
15 Memory Allocation of z is 2353249911312
16 write a float number 9.765
17 value of float is 9.765
18 type: <class 'float'>
19 upper case of that sentence: WELCOME TO DJANGO FOR
WEB AND AI
20 remove whitespace using b.strip(): Python
21 type of c: <class 'int'>
22 type of d: <class 'int'>
23 after conversion, type of c is <class 'float'> and
value is 60.0
24 after conversion, type of d is <class 'float'> and
value is 22.0
25 This is my info dictionary:
26 {'last_name': 'Nomani', 'first_name': 'Shibli', '
employment_status': 'employed', 'nationality': '
Bangladeshi', 'city': 'Dhaka'}
27
28 Process finished with exit code 0
29
